THE WHOLE IS GREATER . . .

Composer Iannis Xenakis said, "The collision of hail or rain with hard surfaces, or the song of cicadas in a summer field. These sonic events are made out of thousands of isolated sounds; this multitude of sounds, seen as totality, is a new sonic event."

What would one cicada sound like, or a lone hailstone hitting the ground? Would we even hear that? How about one raindrop, one low rumble of thunder? But put those individual sounds together in groups and they're powerful.

What can one coin in an offering plate accomplish? Or one volunteer from an entire congregation? What if John the Baptist's lone voice had never been joined by the disciples, and all the Christians after them, sharing the Gospel?

One voice alone isn't inconsequential, just as one coin, one volunteer, one raindrop isn't nothing. But if each felt inconsequential and stopped contributing its "sound," soon there would be nothing. Conversely, when many individuals stay in the game, soon they find they aren't alone at all. God brings their contributions together, creating a whole new "sonic event"! - Newsletter Newsletter
